SOFTWARE

C++ C# C Python Java Kotlin
PHP NodeJs JavaScript TypeScript
Laravel ReactJs NextJs JQuery
.NET

SYSTEMS

Client-server TCP/UDP sockets
Networking Linux servers APIs SSH
Git

CLOUD & DEVOPS

Docker AWS Lambda AWS S3
AWS DynamoDB

DATABASES

MySQL MongoDB Redis Postgres

SECURITY

AES RSA ECDSA Kerberos

HARDWARE & EMBEDDED

RFID Arduino ESP32

AI

OpenAI API Cursor AI
Google Antigravity ChatGPT GrokAI

Passions

Software and system architecture
Sports, Photography, Design

Other

Car B license
English B2, Italian A

About me

I was born in Čačak, Serbia 02.06.2000. Passionate software engineer with a love for software and system architecture. Currently pursuing a Master's degree in Software Engineering. Experienced in designing and developing software and applications, with a track record of successful implementations.

Work experience

- Work at **Inery**, blockchain systems, 2022 (July) - present - C++, Python, Bash, Linux servers, C#, MySql, MongoDB, Blockchain database
- Part-time at **EIK Europe DOO**, race management solutions, 2025 (August) - present
- Internship at **ICraft** Čačak, mobile apps, 2019 (June) - 2019 (July) - C, C++
- Worked at **Parking Servis** Čačak, web systems, 2018 (January) - 2018 (August) - PHP, MySql, JavaScript, Linux servers

Projects

- Flatpack-Protocol (2025)** — Linux kernel module (custom EtherType, 10-byte header, per-CPU debugfs) — repo
- Flatpack (2025)** — structures library in C++ — repo
- Flatpack-Archive (2025)** — archival/serialization layer in C++ — repo
- Race Platform (EIK Race) (2025)** — Laravel backend + C# RFID hardware-software solution — eik-race.com
- Android/Kotlin Betting Platform (Private) (2024)** — Kotlin app + NodeJS sockets/APIs for realtime betting and signal sharing
- Blockchain chat app with smart contract (2023)** — private blockchain cluster, AES encryption — repo
- Octopullo** — trip planning product from brand to production — octopullo.com
- Node Load Balancer (2023)** — Node.js clusters, http-proxy, IPC, React, TypeScript, Socket.IO — repo
- Trading bot on Binance (2023)** — Python, python-binance — repo
- NodeJS RPC/REST APIs server (2023)** — NodeJS, SSH, AES — repo
- Blockchain game API + contract (2023)** — Python, AES — repo
- MVC full stack desktop app (2021)** — C#, SQL, ASP.NET Web App — repo
- Desktop full stack app (2021)** — Java, MySQL — repo

Talks & Events

- Jahorina Tech Conference (2024) — Presented a decentralized database solution.
- TMRW Conference Workshop Speaker (2023) — Blockchain multi-model decentralized database.
- FON Hackathon (2023) — React-Native, Node.js, C++, EOSIO smart contracts ("well-being").
- Republic of Serbia Programming Competition (2017, 2018) — Belgrade.

Education

- Master's in Software Engineering**, in progress
- Faculty of Technical Sciences Čačak**, department Information technologies 2019 - 2023 (9.42)
- Secondary technical school Čačak**, department Information technologies 2015 - 2019 (5.0)
